Topic of the session

Topic 1	Access Your Work from Anywhere securely with SSL VPN
	<p>Your sales person is on his Macbook Air laptop at customer site, he needs a few brochures from the company file server; the CEO is at the airport using his PDA, can't seem to send some urgent emails out from his Windows Mobile's Outlook; the accountant is on sick leave and needs to connect to the office's UBS Accounting system from his home PC to generate a report for the Finance Manager.</p> <p>– Different issues. ONE answer.</p> <p style="text-align: right;"><i>(20 mins)</i></p>
Topic 2	2-Factor Authentication – The Secure Way to Login
	<p>How do you authenticate a person to be your client and not a hacker trying to login to your mission critical portals, online applications, e-commerce, payment gateways, e-Gaming site to perform unauthorized account transactions?</p> <p style="text-align: right;"><i>(20 mins)</i></p>
Topic 3	Simplified Management of Complex Security Environments
	<p>Do you put in too much time & labour managing your network & security infrastructure just to comply to auditor needs? What do you think of the idea of using ONE screen to make sense and react to all security threats & forensic before your business is impacted?</p> <p style="text-align: right;"><i>(20 mins)</i></p>
