Topic of the session

Topic 1	Automate Your Software License Management
	<p>In a growing organization with 10's, 100's and 1000's of PCs and Servers, with ongoing staff replacements, it is almost impossible to go round every single device to manage OS licenses and software updates individually. With auditing organizations such as BSA and governmental bodies on a look out for pirated or expired license software users, you can't risk getting caught to a game of chance. Come learn how to automatically sort, monitor, manage and update your PC / Server myriad of softwares and licenses.</p> <p style="text-align: right;"><i>(20 mins)</i></p>
Topic 2	Configuration Assessment & Change Auditing
	<p>How do you identify and fix unauthorized changes to your IT infrastructure and data, whether caused by a malicious hacker or careless employee? Today's proactive configuration audit and control tools deliver the control you need to keep systems and data in a known and safe state.</p> <p style="text-align: right;"><i>(20 mins)</i></p>
Topic 3	Simplified Management of Complex Security Environments
	<p>Do you put in too much time & labour managing your network & security infrastructure just to comply to auditor needs? What do you think of the idea of using ONE screen to make sense and react to all security threats & forensic before your business is impacted?</p> <p style="text-align: right;"><i>(20 mins)</i></p>
